

## MMU-16LEip *SmartMonitor* PROVIDES A 10/100MBPS ETHERNET PORT FOR REMOTE WAN COMMUNICATIONS CAPABILITY

(Phoenix, AZ, USA) – Eberle Design Inc (EDI) has now added the option of a 10/100Mbps Ethernet communications port to the new industry standard MMU-16LEip *SmartMonitor*<sup>TM</sup> Malfunction Management Unit, for both NEMA TS-2 and TS-1 users.

The use of Ethernet to communicate with the *SmartMonitor*<sup>TM</sup> makes remote diagnostics even easier to accomplish. By furnishing the monitor with an IP address, the unit can be integrated into a wide area network (WAN). Communications may originate from a remote Traffic Management Center, local Controller Unit, or a direct connection to a laptop PC network adaptor.

EDI ECom<sup>TM</sup> software provides a user with the capability to retrieve, display, store, and print real-time status and historical data, as well as multiple Signal Sequence logs providing a graphical view of the signal states for up to 30 seconds prior to a fault event.

The MMU-16LEip *SmartMonitor*<sup>TM</sup> includes a built-in Setup Wizard to **quickly and accurately configure the monitor parameters** simply by answering a short series of questions related to the intersection geometry and cabinet wiring. The built-in context sensitive HELP System and Diagnostic Wizard then **automatically pinpoints faulty signals**, thus providing technicians with an unprecedented amount of assistance and data feedback quickly with a push of the Help button. The MMU-16LEip *SmartMonitor*<sup>TM</sup> menu driven operation presents signal voltages, data logs and vital cabinet information displayed directly on the MMU-16LEip *SmartMonitor*<sup>TM</sup> front panel displays.

The advanced capabilities of the MMU-16LEip *SmartMonitor*<sup>TM</sup> increase the operational level of safety of the intersection and enhances the diagnostic features available. **Why guess when you can know!**

To receive further information on the MMU-16LEip *SmartMonitor*<sup>TM</sup> and our CD-ROM product catalog including a free copy of ECom<sup>TM</sup> software, please call 480-968-6407 or visit our website at [www.EDIttraffic.com](http://www.EDIttraffic.com).

### About EBERLE DESIGN, INC. An ISO 9001:2000 Registered Company – Celebrating 25 Years of Excellence!

EDI is recognized as a world wide developer and manufacturer of reliable high-performance component products designed to enhance and augment traffic control systems. The EDI array of products including signal monitors, vehicle detectors, power supplies, flashers, load switches, and other vital infrastructure devices enables transportation professionals to integrate, automate, and manage traffic highways and intersections easily, efficiently and safely. EDI is a proud member of ITSA, NEMA, ITE, IMSA, IPI, IDA, and AFA industry organizations.
