### Press Release

#### INTRODUCING THE NSM-E SERIES ENHANCED SIGNAL MONITORS FOR NEMA TS-1 CABINET CONFIGURATIONS

The **NSM-E Series** advances the capabilities of basic NEMA TS-1 monitors providing a **Full Intersection LED Monitoring Display and Event Logging Port for Advanced Intersection Monitoring**

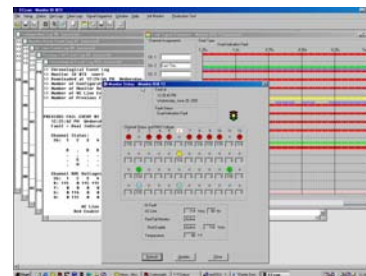

(Phoenix, AZ, USA) – Eberle Design, Inc. (EDI) is very pleased to announce the launch of the new NSM-E series signal monitors. The NSM-E series is a complete full featured signal monitor that will enhance safety levels and maintenance efficiency for NEMA TS-1 cabinet configurations. The series models are the NSM-6E (6 channel) and NSM-12E (12 channel).

Both models immediately supersede and replace the NSM-6, NSM-12, SSM-6E, and SSM-12E models. The NSM and SSM-E series will be removed from production in Q4 of 2009.

The all new NSM-6E and NSM-12E provide a full intersection four-color LED display along with a serial communications port on the front panel. Access to the full event logging capability of the monitor uses the serial port and the industry standard EDI ECom software. Fault coverage has also been improved and now includes Dual Indication and Clearance monitoring.

The free EDI ECom™ software provides technicians with a PC immediate access to the right tools when responding to intersection cabinets that have malfunctioned, thus eliminating long delays in restoring intersection operations.

EDI ECom™ software (download FREE at [www.EDIttraffic.com/eecom.html](http://www.EDIttraffic.com/eecom.html)) provides a user with the capability to retrieve, display, store, and print real-time status and historical data, as well as multiple Signal Sequence logs providing a graphical view of the signal states for up to 30 seconds prior to a fault event.

To receive our CD-ROM Product Catalog and further information on the new NSM-E Series Signal Monitors, please call +1-480-968-6407 or visit our website at [www.EDIttraffic.com](http://www.EDIttraffic.com).

#### About EBERLE DESIGN, INC.

**An ISO 9001:2000 Registered Company – Celebrating 29 Years of Excellence!**

EDI is recognized as a world wide developer and manufacturer of reliable high-performance component products designed to enhance and augment traffic control systems. The EDI array of products including signal monitors, vehicle detectors, power supplies, flashers, load switches, and other vital infrastructure devices enables transportation professionals to integrate, automate, and manage traffic highways and intersections easily, efficiently and safely. EDI is a proud member of ITSA, NEMA, ITE, IMSA, IPI, IDA, and AFA industry organizations.
