**SIMPLE TO USE LCD SIGNAL MONITOR SAVES VALUABLE TIME
ON SYSTEM INSTALLATIONS AND TROUBLESHOOTING,
THUS BANKING BUDGETED DOLLARS**

(Phoenix, AZ., USA) - Never before has trouble shooting traffic signal cabinets and programming signal monitors been more effective, expedient, yet simple. Whether you're a novice or expert Signal Technician, the MMU-16LE SmartMonitor™ has been designed to accurately configure your signal monitor to the requirements of the cabinet and intersection.

The MMU-16LE SmartMonitor™ includes a "built-in" context sensitive HELP System and Diagnostic Wizard to automatically pinpoint faulty signals; thus, providing technicians with unprecedented amount of assistance and data feedback quickly from the front panel Liquid Crystal Display. The SmartMonitor™ also includes a "built-in" version of EDI's ECcom software which enables data logs and vital cabinet information to be accessed directly from the SmartMonitor™ or your PC.

For 25 years Eberle Design has been proud to be the #1 trusted company for designing and manufacturing mission critical signal components with the highest degree of quality and reliability. We continue in this tradition with the introduction of the ideal product - the MMU-16LE SmartMonitor™.
